

In grids, fields appear as columns similar to those on a spreadsheet. Fields in a grid belong to one table in your database. Grids enable you to visually distinguish those rows of data at a glance and to add, edit, and view multiple occurrences of data for a group of fields on a page.

In this topic, you look at grids used for setting up an emergency contact.

Navigation:

4.	A dashed underline indicates availability of a mouseover popup page.
	Point to the Megan Sutherland link.
5.	When the Mouseover Popup Event is enabled (My Personalizations) additional information about a subject that is dash-underlined appears in a popup window when you hover over the subject. The popup window disappears when you move the mouse.

Step	Action
6.	The Other Phone Numbers page in the Emergency Contact component contains a grid area. Click the Other Phone Numbers tab.
	Other Phone Numbers
7.	On some pages, you may want the fields to repeat in order to enter multiple rows of data.
	Grids look similar to a spreadsheet with column headings, rows, and cells. The cells are equivalent to fields. Fields within a grid may be represented as edit boxes, drop-down list boxes, check boxes, and radio or prompt buttons.
8.	Rows of data in grids always share the same high-level keys.
	For example, for the Other Phone Numbers page, you can have multiple rows for the different phone types. If you have multiple rows, each of these rows has the same Person ID as the key field. If you insert a new row, the system automatically copies the shared key data into the new row.
9.	Instead of using a traditional scrollbar to scroll through the rows of data in a grid, UCPath uses navigation buttons and hyperlinks.
	Most often, you will find these buttons and hyperlinks in the navigation header for each area, with the exception of the Insert Row and Delete Row buttons.
10.	Use the Find link to find a specific row of data.

OF CALIFORNIA UCPath

Step	Action
11.	Use the View All link to display all rows of data on a page. When this feature is enabled, the link changes to read View 1 , so that you can return to the original setting.
12.	The First link takes you to the first row of data.
13.	Use the Previous Row arrow to navigate to the previous row of data.
14.	The number range for the rows shows the number of rows you are currently viewing.
15.	Use the Next Row arrow to navigate to the next row of data.
16.	The Last link takes you to the last row of data.
17.	The Add Row button inserts a new row of data.
18.	The Delete Row button deletes the current row of data.

19.	Another type of grid is a tabbed grid. These grids provide a means of viewing multiple columns of information without having a horizontal scroll to view them.
	For this example, we navigated to the Compensation page in the Job Data component for you (notice the navigation path at the top of the page). You can see a tabbed grid section labeled Pay Components . You select a tab to view the additional columns.
	Click the Changes tab.

Step	Action
20.	Notice that different columns appear for the newly selected tab.
	Click the Amounts tab.
	Amounts
21.	To add data on this page, you must use Correct History.
	Click the Correct History button.
	Correct History

Step	Action
22.	To add a new row of data to a grid, you click the Add Row button to insert a row just below the row you are on. Each time you add a new row, you are actually adding a new row of data to the database table.
	Click the Add a new row button.
23.	A new row is now available. Notice that the number system for the rows in the grid navigation header now shows 1-3 of 3.
24.	If you want to delete a row, click the Delete Row button. Click the Delete row button.
25.	The system displays a confirmation message asking if you want to proceed with the deletion. It also reminds you that the row will not be deleted from the database until a save occurs; however, the row is automatically removed from the grid. Click the OK button.
26.	You may also encounter grids that can be collapsed or expanded. By clicking the right pointing arrow in front of the grid heading, you can expand a grid that is hidden from view or collapsed. Click the Expand section button.
27.	You can collapse the grid by clicking the down arrow in front of the grid heading. Click the Collapse section button.
28.	You have successfully used UCPath's grid area navigation structure with multiple rows of data. End of Procedure.
